Vikas Jha

Founder & Chief Executive Officer at Cymmetri

Mumbai, Maharashtra, India

Summary

As the founder of Cymmetri, a converged Identity & Access
Management platform, I am dedicated to helping organizations
protect their sensitive data and fortify security framework from cyber
attacks.

With nearly two decades of rich experience in the IT industry, I have
helped organizations build & implement security strategies and
solutions, identify security vulnerabilities and consulted ways of
addressing them, promoted open source software merits and usage,
contributed back to the community, and more.

I am deeply passionate about IT security and derive immense
satisfaction from witnessing that my team at Cymmetri shares the
same level of zeal and enthusiasm that I do. I believe that is one of
the reasons why Cymmetri is being appreciated in the market today.
